

Neochimiki supports the Greek farmers - Apprising and consulting

On the 11th, 12th, 13th and 24th of November four grand assemblies took place by the Business Unit of Fertilizers with great success. Three of them were conducted in the district of Crete, mainly with the participation of producers of olive oil, having as a subject "Good fertilization practices and the cost effectiveness of fertilization in the olive cultivation". The aforementioned assemblies took place in Chania, Asimi-Messaras and in Sitia with the assistance of our collaborators at each place.

Furthermore, in the context of an informative process, a multitudinous assembly was conducted in Santorini with the "Union of Santorini Cooperatives (named as SantoWines)", under the subject of "The fertilization in vineyard and in the rest cultivations of the island".
